

Kim Knotts

Kim K. has been the BIMS Administrator for the Neuroscience Graduate Program (NGP) since joining our team in February 2022. From her former position as the Medical Education Coordinator in Pathology, Kim brought phenomenal organizational skills and a strong background in program coordination. She also brings to her role a deep empathy for trainees and a passion for evidence-based approaches to improve trainee experience. A native of North Louisiana, she came to Virginia with her husband in 2015 when he accepted a postdoctoral fellowship in the Chemistry Department at UVA. She is an avid reader and is always looking to hand off the books that she has finished to new owners.

In late 2024, Kim was promoted to Senior BIMS Administrator – a new position resulting from a reorganization within our office. In this new role, she has taken on supervision of the BIMS Administrator Team, directing them in a process documentation effort while simultaneously enhancing efficiency through strong communication and collaboration. She also continues to provide extraordinary support to the NGP, where she manages student affairs, academic tracking and oversight, curriculum support as well as simply being a valued resource for all things for the students in her program.
