Christine James MSc MD

Physician, Institute for Asthma and Allergy, Wheaton and Chevy Chase MD; Virginia
Clinicians for Climate Action and Climate Health Now

Lena Bichell, SMD 2023

Climate Change and Health medical student interest group, UVA

In what's described as an "existential" threat globally, climate change is having substantial impact on Virginia's weather, land and coast, our economy, and living conditions throughout the Commonwealth. But climate change also has serious implications potentially harmful to the health of Virginians, especially communities rendered more vulnerable, historically and economically, by where and how they live, work, and play. What do healthcare practitioners and organizations need to know to help meet the health challenges of climate change and better care for Virginians?
