      12:15 - 1:15 Department Update/Grand Rounds Lecture

TITLE: “The NHS at 70: Improving the Health of a Nation”

Speaker: Dr. Stephen Powis

For CME and MOC go to: https://med.virginia.edu/cme/learning/uvarss/medgrmoc/

LEARNING OBJECTIVES:

1) To understand the basis of the English National Health Service (NHS) and how it compares with other comparable health systems

2) To understand the rationale for the ‘NHS Long Term Plan’ and how it sets out to improve the health of the nation over the next decade

QUESTIONS:

1. Which of the following is not a key attribute of the National Health Service (NHS) in England:
   a) It is funded through insurance schemes
   b) With only a few exceptions it is delivered without a fee to the patient
   c) It is founded on the principle of universal access to care
   d) It has a workforce of around 1.2 million employees

2. According to the Commonwealth Fund, the UK health system performs worst with respect to:
   a) Administrative efficiency
   b) Care Process
   c) Health Care Outcomes
   d) Equity

3. Which of the following is not a core ambition of the NHS Long Term Plan:
   a) Ensure 75% of cancers are diagnosed at an early stage
   b) Prevent 150,000 heart attacks, strokes and cases of dementia over the next ten years
   c) Develop a more networked approach to primary care
   d) Continue to develop an internal market for health in which competition between health providers is the primary way to drive improvements in quality

4) True or False: The UK government has a five-year strategy to tackle antimicrobial resistance aimed at reducing antimicrobial use in humans by 15% by 2024

5) True or False: Investment in mental health services is growing at the same rate as other patient services in the overall English NHS budget

DISCLOSURES: none to declare
