A

Operation mode

- 1 Order on line for delivery to your lab within the Medical Center complex
- 2 Pick up orders in OMS Room 6834
- 3 Special order non stock items from current vendors to save shipping and EVA fees

Initial Product Offering

Product lines currently in stock:

- Roche-enzymes for molecular biology
- Qiagen-reagents for DNA preparation
- Invitrogen-reagents for molecular biology
- Statagene-Molecular Biology reagents, some Comp Cells
- Applied Biosystems-DNA sequencing preparation reagents, plates, tubes Ambion reagents
- Bio-Rad-electrophoresis supplies
- NEB-restriction enzymes
- Fisher-lab supplies, gloves, kimwipes,
- BioLine-DNA preparation reagents
- Pierce-Protein analysis reagents
- USA Scientific- Plastics, pipettes

New developments

Discounted Custom Primers from Invitrogen

Discounted Custom Peptides from AnaSpec
