

Genome Sciences Seminar Series

Fall 2011

- 
- Sept. 12** **Coleen A. McNamara, MD, University of Virginia**
Id3 and Atherosclerosis: Bench to Bedside
- Sept. 19** **Stephen S. Rich, PhD, University of Virginia**
The NHLBI Exome Sequencing Project
- Sept. 26** **Dr. Vincent Plagnol, University College London (UCL) Genetics Institute**
From Common to Rare: The Spectrum of Genetic Variation in Autoimmune and Primary Immunodeficiency Disorders
- Oct. 3** **M. Ilyas Kamboh, PhD, FAHA, University of Pittsburgh**
Biology, Epidemiology and Genetics of Alzheimer's Disease
- Oct. 10** **Reading Days - No Seminar**
- Oct. 17** **Lei Li, PhD, University of Virginia**
MicroRNA-mediated Gene Networks in Arabidopsis thaliana
- Oct. 24** **James Taylor, PhD, Emory University**
Accessible, Transparent, and Reproducible Analysis with Galaxy
- Oct. 31** **David S. Roos, PhD, University of Pennsylvania**
What is Systems Biology? Designing and Mining (Pathogen) Genome Databases
- Nov. 7** **Richard Bonneau, PhD, New York University**
Building and Exploring the Global Regulatory Network that Governs T-cell Differentiation and Function
- Nov. 14** **Karen Mohlke, PhD, University of North Carolina - Chapel Hill**
After GWAS: Functional Alleles at Type 2 Diabetes and Lipid Loci
- Nov. 21** **Thanksgiving Week - No Seminar**
- Nov. 28** **Emilie Rissman, PhD, University of Virginia**
Genetic Approaches to Studies of Sex Differences in the Brain
- Dec. 5** **Douglas Taylor, PhD, University of Virginia**
Mutational Processes and the Evolution of the Mitochondrial Genome in the Plant Genus Silene
