

Genome Science Seminar Series

Mondays – 4-5pm in MR5, Room 1041

Refreshments will be served at 3:45p.m.

September 13 th	Aviv Regev, PhD Broad Institute	It's About Time: Rewiring Regulatory Circuits
September 20 th	Richard Wilson, PhD Washington University	Adventures in the Cancer Genome
September 27 th	Kevin Janes, PhD University of Virginia	Single-cell Transcriptional Heterogeneities in Breast Epithelial Cells
October 4 th	William Petri, Jr., MD, PhD University of Virginia	A Common Polymorphism in the Leptin Receptor Influences Susceptibility to Amebiasis
October 18 th	Eric Green, MD, PhD Director, National Human Genome Research Inst., NIH	Genomics in 2K10 and Beyond: Charting a Course for Genomic Medicine <i>*Jordan Hall Conference Center Auditorium*</i>
October 25 th	Roderick Jensen, PhD Virginia Tech	The Human Mitochondrial Transcriptome Project
November 1 st	Michael Timko, PhD University of Virginia	Functional Genomics of Plant-Parasite Interactions
November 8 th	Ira Hall, PhD University of Virginia	Next-generation Sequencing of Structural Variation in Germline and Somatic Genomes
November 15 th	Andrew Singleton, PhD National Inst. on Aging, NIH	Finding and Understanding the Genetic Basis of Parkinson's Disease
November 29 nd	Greg Buck, PhD Virginia Commonwealth University	The Vaginal Microbiome Project: <i>Lactobacilli</i> , <i>Lachnospiraceae</i> , <i>Sneathia et al.</i>
December 6 th	Michele Sale, PhD University of Virginia	Genomic Analyses of Chronic Middle Ear Infection (Otitis Media)
