

Genome Sciences Seminar Series

Fall 2014

- Sept. 24** **Charles R. Farber, PhD, University of Virginia**
Network-Based Genetic Discovery for Complex Skeletal Traits
- Oct. 1** **Jung-Bum Shin, PhD, University of Virginia**
*Proteomics and CRISPR/Cas Genome Editing Empower
Discovery of Novel Deafness Genes*
- Oct. 8** **Nora Franceschini, MD MPH, University of North Carolina-Chapel Hill**
*The Genetic Variation in American Indians and Insights on
Cardiovascular Traits*
- Oct. 15** **Thu Le, MD, University of Virginia**
*Role of GSTM1 in Susceptibility to Kidney Disease and Progression:
from Bench to Population*
- Oct. 22** **No Seminar** - American Society of Human Genetics Annual Meeting
- Oct. 29** **Jonathan Kipnis, PhD, University of Virginia**
Immune System in Support of the Nervous System
- Nov. 5** **Abraham A. Palmer, PhD, University of Chicago**
*Quantitative Genetic Studies of Behavior and Other Traits
Using Mice, Rats and Humans*
- Nov. 12** **Nicholas Navin, PhD, MD Anderson Cancer Center**
*Investigating Clonal Diversity and Evolution in Breast Cancer
with Single-Cell Sequencing*
- Nov. 19** **Steve Munger, PhD, The Jackson Laboratory**
*Finding Sex in the Circuitry: Toward a Predictive Network Model
of Mammalian Sex Determination*
- Nov. 26** **No Seminar** - Thanksgiving Week
- Dec. 3** **Alexis Battle, PhD, Johns Hopkins University**
Title: To Be Announced
