

## Genome Sciences Seminar Series

Fall 2015

- Sept 9**      **Sarah H. Elsea, Ph.D., FACMG, Baylor College of Medicine**  
*Untargeted metabolomic profiling ends the diagnostic odyssey*
- Sept 16**      **No Seminar** - United Way Day of Caring
- Sept 23**      **David Wotton, PhD, University of Virginia**  
*Control of prostate cancer metastasis by TGF beta signaling*
- Sept 30**      **Jeff Leek, PhD, Johns Hopkins University**  
*Engineering new tools for differential expression analysis*
- Oct 5 (4PM)**      **Mary-Claire King, PhD, University of Washington**  
ANDERSON DISTINGUISHED LECTURE - MONDAY AT 4PM  
Claude Moore Medical Education Auditorium (Rm. 3110)  
*Genomic Analysis of Inherited Breast and Ovarian Cancer:  
From Gene Discovery to Individualized Medicine & Public Health*
- Oct 14**      **Tarek Abbas, PhD, University of Virginia**  
*New molecular target and therapeutic approach for melanoma*
- Oct 21**      **Jeffrey Smith, PhD, University of Virginia**  
*Sirtuin-mediated regulation of long-range chromosomal  
structure and function*
- Oct 28**      **Joe Pickrell, PhD, New York Genome Center**  
*Using large-scale genomic data to learn about human history  
and variation*
- Nov 4**      **Barbara Stranger, PhD, University of Chicago**  
*Sex-Specific Genetic Architecture of the Human Transcriptome*
- Nov 11**      **Leslie Lange, PhD, University of North Carolina-Chapel Hill**  
*Title TBA*
- Nov 18**      **Alban Gaultier, PhD, University of Virginia**  
*Title TBA*
- Nov 25**      **No Seminar** - Thanksgiving Week
- Dec 2**      **Gerard D. Schellenberg, PhD, University of Pennsylvania**  
*Progress in Neurodegenerative Disease Genetics*
