

GRADUATE MEDICAL EDUCATION COMMITTEE POLICY NO. 13

- A. SUBJECT: Other Learners
- B: EFFECTIVE DATE: October 18, 2017 (R)
- C: POLICY: Presence of Other Learners

The presence of other learners in the GME programs' clinical learning environment must not interfere with the appointed trainees' education. The program director must report the presence of other learners who interfere with trainee education to the DIO and GMEC. GME trainees can also report presence of other learners who interfere with their education.

The GMEC encourages programs to review the results of the anonymous ACGME resident survey with their graduate medical trainees, addressing the question of interference from other learners.
