

- You will receive an UVaMC MCCSecurity email per your Safenet VPN Software Token request.
- **IMPORTANT:** *Open the UVaMC MCCSecurity email on the device where the 'VPN Safenet MobilePASS Software Token' is to be installed/used.*
 - **iPhone/iPad:** Open the email on your iPhone/iPad.
 - **Android Phone/Tablet:** Open the email on your Android Phone/Tablet.
- **Note:** Install your requested VPN token *as soon as possible.*
 - **Your VPN token request will expire ten (10) days from the initial enrollment email date (Step 1 below) and will be automatically revoked.**
- The following is an installation demonstration of a 'Safenet VPN MobilePASS Token' for *iPhone.*
 - *The installation sequence will be similar for Android devices.*

- 1) Open the UVaMC MCCSecurity Email **on the device** that you plan to install/use the SafeNet MobilePASS Software VPN Token on.

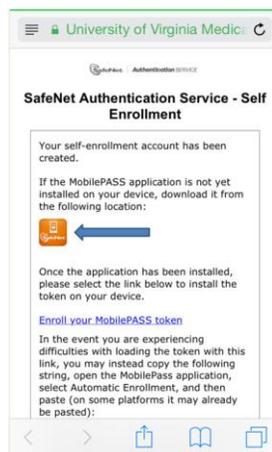

- 2) Read the instructions in the self-enrollment email message from MCCSecurity and click on the embedded **Hyperlink**.

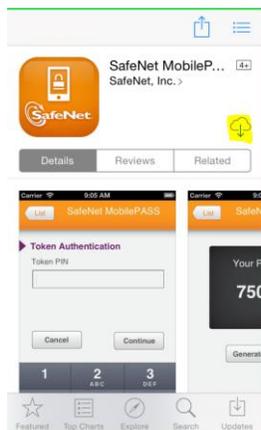

- 3) This will automatically open your default Web Browser on your device to the ‘SafeNet Self-Enrollment Webpage’.

- 4) If you have **not** previously installed the SafeNet MobilePASS Application software, click on the orange Safenet Icon.

- 5) This will automatically re-redirect you to the appropriate download location for the SafeNet MobilePASS software. (I.e. IOS devices- ; Android devices- )

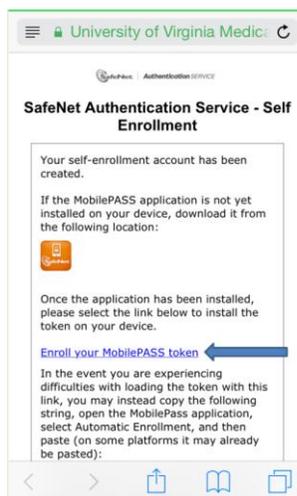

- 6) Install the SafeNet software application on your device (this may require you to input your device personalized password in order to perform the installation).
- 7) **Do not** open the SafeNet Application on your device after the installation is complete.

- 8) Navigate back to your device's Web Browser with the 'SafeNet Authentication Service – Self Enrollment' Webpage (reference Steps 3 & 4 above).

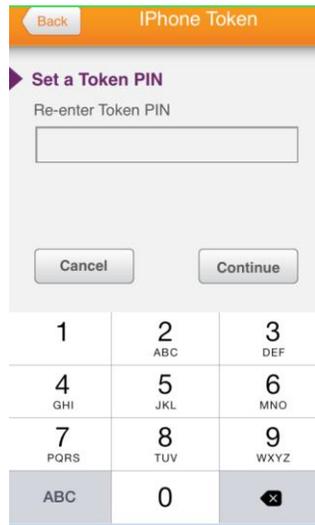

- 9) Click on the 'Enroll your MobilePASS Token' [hyperlink](#) on the Webpage. This will now automatically open the 'SafeNet MobilePASS application/software' on your device (installed per Steps 5 & 6 Above).

- 10) In the 'SafeNet MobilePASS application' on your device:
- a) Personalize the Token name (avoid special characters) in the 'New Token Name' field
 - b) Click on 'Activate'

11) Create a 4 digit personalized, numeric Token PIN. Confirm the 4 Digit Token PIN.

12) After your personalized Token PIN is entered, the SafeNet MobilePASS OTP (One Time Password) is displayed.
