fax: 434-982-0874

Oversight Executive:
Senior Associate Dean for Research
PO Box 800793
Charlottesville, VA 22908
phone: 434-243-7088
fax: 434-982-0874

Applies to:
Department chairs and center directors who have research laboratory space assigned to their unit.

Reason for Policy:
This policy was developed to help address a research space shortage in the School of Medicine. It helps to ensure that research lab space is used most efficiently.

Definition of Terms:
For this policy, research space is defined as “wet” research laboratory space, and “dry” research space. Dry research space includes any space used to house research personnel or computational equipment, including computers, servers or similar equipment whose main function and use is for the performance of research.

Policy Statement:
The baseline for research productivity is $300/sq ft of research space.

Procedures:
The Dean’s Office will review space utilization for each department and center annually, using data that have been validated and confirmed by the departments and centers. Existing commitments of space by the Dean will be evaluated in light of a unit’s current research laboratory productivity.

The Dean’s Office and Research Advisory Committee (RAC) periodically will review institutional space metrics and the Research Space Use Standards Policy and make changes as necessary.
If a department or center’s external research support is less than $300/sq ft, the department chair or center director will provide the Dean with an explanation for sub-standard performance and a plan and timeline for meeting the standard. The types of measures that will be appropriate for this situation include hiring new tenure-track faculty whose research programs will be carried out in the space or increasing the level of individual support by obtaining new funding. If the proposed solution is not acceptable or if the plan to reach or exceed $300/sq ft is not implemented effectively within the approved time period, the Dean’s Office will have the option to re-assign some space to another department, center, or program on the space waiting list. The department or center and the Dean’s Office will negotiate the amount and the specific space to be reassigned. If the amount of space reassigned raises the departmental mean dollars/sq ft above $300, the guidelines below for rent will apply to the amount of space that meets or exceeds $300/sq ft.

Research space will be solicited for interim institutional use/rental on a voluntary basis from departments that are operating at greater than $300/sq ft. The conditions for this rental will be as follows:

1. A rental period of 6-24 months will be agreed upon and rental terms will be established in a lease.
2. The School of Medicine will pay rent of $20/sq ft/year to the department or center from which the space is rented.
3. If unexpected circumstances preclude vacating the space at the end of the agreed upon term, all parties will negotiate a time period of extension.
4. Departments may also choose to rent space from other departments, at a mutually agreed-upon rental rate ($/sq ft). The Dean’s Office should be notified during such negotiations and the final agreement should be filed with the Office for Space Management in the Dean’s Office.

Next Scheduled Review: September 2016

Revision history: Implemented April 4, 2004; updated 2/22/07, 2/17/10, 11/12/13

Approved:
