

## Transfer UVA images to an outside facility

1. Be prepared with your patient's full name and MRN, as well as with the study description(s) and date(s) of the studies you are requesting be transferred from UVA Radiology PACS. You will also need to identify the site to which you wish to send images. Site name, site location, and site phone contact number are all helpful.
2. Contact UVA Image Management to make the request and share the above information. You can email the group [CLRadiologyImageManagement@hscmail.mcc.virginia.edu](mailto:CLRadiologyImageManagement@hscmail.mcc.virginia.edu) (aka **CL Radiology Image Management** in UVA Outlook) or call **(434-243-6700, option 1)**.
3. The necessary file sharing approach will vary amongst outside facilities; however, the UVA Image Management team will work with the outside facility as needed to complete the necessary steps.

Note: If the outside facility does not already have an arrangement with us, our default will be to use our new image-sharing platform from Ambra. The receiver will receive an email stating that images have been shared to them using Ambra. They will be prompted to create a personal account and accept the terms of use. This will allow them to view the images or manually download the imaging studies to a folder on their desktop. Most likely it will download in a zip file that will need to be unzipped prior to their PACS ingestion.
