

## Department of Radiology Residency Program Core Curriculum

The Core Curriculum of the Diagnostic Radiology Residency Program is partitioned into two to four week rotations in the annual block schedule. The block schedules for the Diagnostic Radiology Residency Program, as well as the Early Specialization in Interventional Radiology (ESIR), Global Health Leadership Track (GHLT), Nuclear Medicine Dual Certification Pathway, Research Track, and Pediatric Imaging Dual Certification Pathway are listed below.

Track-specific rotations or deviations from the main Diagnostic Radiology Residency block schedule are highlighted in red and green below.

Explanation or definition of some terms:

FLEX: This is protected time for our residents to choose to revisit rotations in which they feel they need additional experience before taking independent call.

Late Shift: This “second shift” rotation is designed to augment after-hours acute care coverage, spanning transition from the end of the regular workday to the beginning of night float.

AIRP: ACR Institute for Radiologic Pathology (<https://www.acr.org/Lifelong-Learning-and-CME/AIRP/Four-Week-Course>).

NICV: Non-invasive Cardiovascular Imaging rotation.

Fluoro: GI fluoroscopy rotation.

Zion: Off-site outpatient imaging center staffing time used primarily as a study or academic rotation.
