

# UNIVERSITY *of* VIRGINIA

## Medical Toxicology Fellowship

### Clinical Experience

- The UVA Medical Toxicology Consultation Service provides patient care at the UVA Health System, a nationally ranked, tertiary care referral center and level 1 trauma center located in Charlottesville, VA.
- The local and referral patient population ensures a broad variety of consultations which include emergency department, inpatient, clinic, and poison center settings.
- The hands-on patient care provided allows for mastery of the subtle clinical findings of the poisoned patient.

### Teaching & Research

- Teaching is of the utmost importance and occurs daily, with teaching rounds and didactics led by the Medical Toxicology Attending each morning.
- Fellows take part in dedicated weekly educational sessions, designed to provide more in-depth education and prepare for the independent practice and boards.
- Numerous opportunities exist for fellows to develop their teaching skills with local and regional lectures.
- Fellows are encouraged to attend development workshops offered at the University and participate in the Public Health certificate program.
- Fellows develop skills that will allow them to become independent researchers.
- Faculty are involved in basic science and clinical research, and with a dedicated full time epidemiologist, ample epidemiological research opportunities abound.
